UK Manufacturing

All our products originate from established British manufacturing companies, producing the highest quality of goods.

Where we Operate

We cover the Middle East, Sri Lanka and South East Asia.

W GREER LTD HAS BEEN MANUFACTURING, REPRESENTING AND DISTRIBUTING UK AND EUROPEAN MADE PRODUCTS TO THE MIDDLE EAST AND SOUTH EAST ASIA FOR THE LAST 50 YEARS.

This brochure details some of the more popular products on offer through W Greer Ltd. However, we manufacture, represent and distribute a wider range of products for all types of engineering and retail. For more details contact enquiries@wgreerltd.co.uk and we will be happy to assist with your requirements all the way through to delivery.

Andrew Greer & Sons (AGS) Ltd

Andrew Greer & Sons (AGS) is a leading producer of high quality anti-corrosion pipe-wrap from the UK. AGS also produce other products such as leaded and unleaded solder wire to the highest standard.

AGSSLDO2 AGS SOLDER WIRE
CAPILLARY 3MM

AGSSLDO1 AGS LEAD FREE SOLDER
WIRE 3MM

AGSFLUX AGS FLUXPASTE

AGS Fluxpaste is a self cleaning Soldering flux used for capillary joints on copper pipework, brass and mild steel.

AGS Fluxpaste is UK WRAS listed for both hot & cold water including potable water.

AGS PTFE THREAD SEAL Tape
Conforms to BS7786

12mm or 25mm width. 10m or 12m in length.

'AGS' GREASY PIPEWRAP INSULATING TAPE

An anti-corrosive non-cellulose waterproof membrane based on refined petroleum condensates with added inhibitors and moisture displacement agents. The carrier is a strong non degradable flexi-tape allowing accurate contour contact with virtual elimination of air pockets and loose wrap and ensuring excellent jointseal at overlaps. 'AGS' GREASY PIPEWRAP INSULATING TAPE has been approved and is used by Electricity and Gas Authorities.

Related products to be used in conjunction with AGS Greasy Pipewrap are:

AGS PRIMER

A single pack coating based on a bituminous wax blend, intended to protect steel surfaces against corrosion.

AGS GREASY WRAPPER TAPE PRIMER can be applied by brush, roller or spray prior to the application of AGS GREASY WRAPPER TAPE.

AGS GREASY MASTIC BLANKET

Anti-corrosive cold applied preformed layer of petroleum condensates with added inhibitors and moisture displacement agents. Containing inert siliceous fillers and cellulose fibres. This mastic is backed with a polyester fabric fully impregnated with a petrolatum compound. AGS GREASY MASTIC BLANKETS has been approved and is used by Electricity and Gas Authorities.

Additional protection can be obtained by overcoating with AGS GREASY WRAPPER TAPE.

Packaging For more information on any of these products, please email: enquiries@greer-exporting.co.uk
250mm 8 blankets per carton

300mm 8 blankets per carton

450mm 4 blankets per carton

500mm 4 blankets per carton

600mm 4 blankets per carton

AGS GREASY PASTE

A soft mouldable blend of petrolatum and inert fillers containing anti-corrosive inhibitors and moisture displacement agents. AGS GREASY PASTE has been approved and is used by Electricity and Gas Authorities.

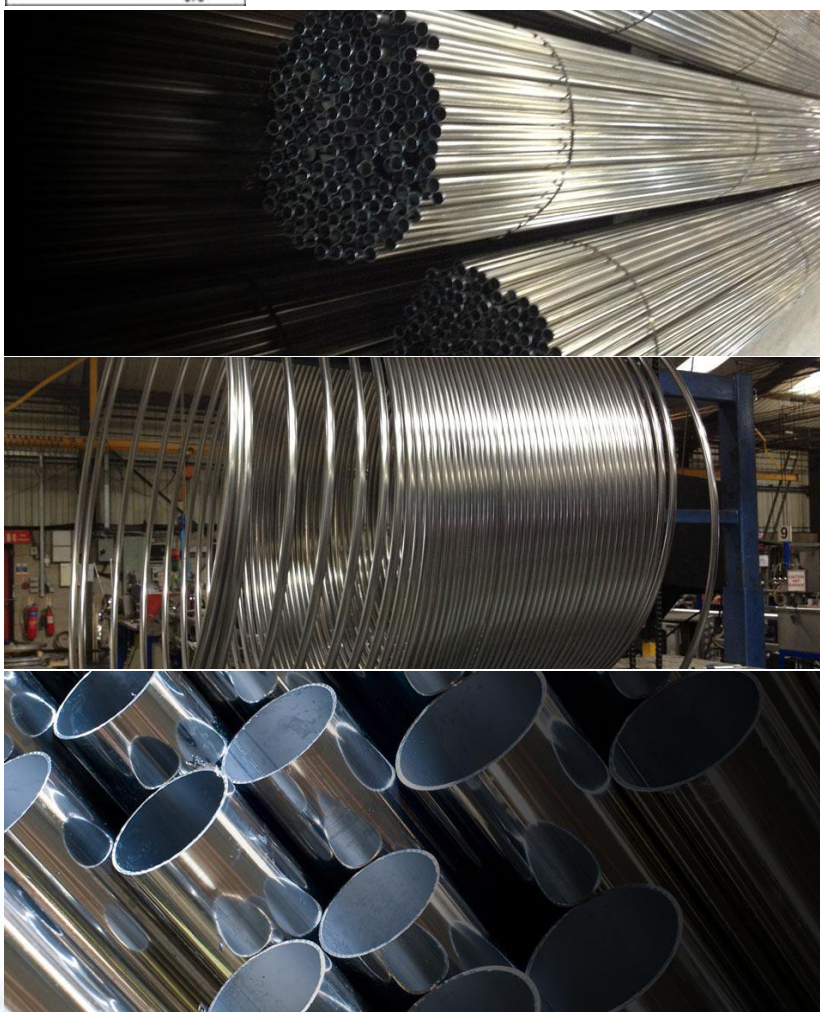

Packaging 20 litre drums and 5 litre pails.

AGS also supply a cold applied Bitumen PVC Overwrap complete with release paper.

AGS is a market leader in the supply of UK manufactured high quality welded stainless steel tubes.

AGS supply tube worldwide and prides itself on being unique in its ability to offer a range of products and services unrivalled by our competition. This together with our commitment to customer service and satisfaction demonstrates our desire to be the market leader within our field.

MANUFACTURING SPECIFICATIONS
Tubes manufactured in accordance with
BS EN 10296-2:2005
BS EN 10217-7:2005
BS EN 10312 : 2002
ASTM A249
ASTM A269
ASTM 554

Tube EN10312 1.4301 (304)
SST 15 - 15mm OD x 0.6mm wt x5800mm
SST 22 - 22mm OD x 0.7mm wt x5800mm
SST 28 - 28mm OD x 0.8mm wt x5800mm

**“HELDITE”
Jointing Compound**

Heldite Jointing Compound is a high performance sealant for preventing leakage of Petrol, Diesel Fuel, Hydraulic Fluids, Oils, Paraffin, LPG's, Water, Steam and Gases in all branches of Automotive, Auto mechanical, Electrical and General Engineering, Plumbing, Heating and Pipeline Services

Kommerling Industrial Sealants & Adhesives

Kommerling UK Ltd is a subsidiary of Adco Global Inc, an international group of Companies in strategic locations around the world. It has over 100 years experience in the development, manufacture and distribution of high quality adhesives and sealants for a variety of applications, including Glass, Solar / Photovoltaic, Transportation and General Industrial.

Stag brand Jointing Compounds are manufactured to specific industry standards and are easy release, lead free jointing compounds of smooth consistency for use on flanged or screw threaded joints. These products meet the relevant industry standards for use on pipework carrying water (including potable water), brine, steam, gas (including liquefied and natural gas), fuel oil, diesel oil, petrol or compressed air.

The range includes:

Stag A & B
Stag White and Stag White Universal
Plasti-Coll X10 and Plasti-Coll X10G
Wellseal

Steel Test Plugs

- Available from 40mm up to 450mm diameter.
- Chemical resistant Seals can be supplied to order.
- "Double Seal" plugs can be supplied to order.
- Thrustwashers fitted as standard on all sizes.
- Zinc plated – corrosion resistant to 90 hours salt spray test.
- Combines the economy of price with the strength of steel.
- Carries the Horobin name – quality guaranteed.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum test pressure, and weight of Plug are available on our Web Site.

Aluminium Test Plugs

- Available from 40mm up to 900mm diameter.
- Aluminium plates combine strength with lightness.
- Thrustwashers fitted as standard on all sizes.
- Chemical resistant Seals can be supplied to order.
- "Double Seal" plugs can be supplied to order.
- Steel components are zinc plated to 90 hours salt spray test.
- Carries the Horobin name – quality guaranteed.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum test pressure, and weight of Plug are available on our Web Site.

Super Nylon Testing Plugs

- Available from 18mm up to 150mm diameter.
- Superior design – easier to use.
- Can be used for testing up to 7p.s.i.
- Designed to fit Telecommunication Ducts for temporary sealing to prevent ingress of vermin and sand.
- Easy to sterilise so can be used in Hospitals, Food Processing Plants etc.
- Carries the Horobin name – quality guaranteed.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum test pressure, and weight of Plug are available on our Web Site.

End of Pipe Testing/Sealing Plugs

- For temporary sealing of new pipework on construction sites.
- Easier to use than traditional Test Plugs – fit flush onto the end of the pipe.
- Available from 50mm up to 250mm diameter.
- Can be supplied with or without a Waterway/Airway.
- Zinc plated – corrosion resistant to 90 hours salt spray test.
- Carries the Horobin name – quality guaranteed.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum test pressure, and weight of Plug are available on our Web Site.

MDPE/HDPE Test Plugs for Pressure Testing to 6bar

- Available for Pipe Sizes from 25mm up to 75mm outside diameter.
- For use with small bore copper, steel or MDPE/HDPE piping.
- Suitable for Pressure Testing up to 6bar.
- Suitable also for telecommunications, refrigeration, air conditioning, heating, process plant and food manufacturing.
- "Double Seal" plugs can be supplied to order.
- Steel components are zinc plated to 90 hours salt spray test.
- Carries the Horobin name – quality guaranteed.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum

Steel Test Plugs (Type 920) Pneumatic Seals

- Multiple compression points around the perimeter of the plug enable the seal to expand in localised areas.
- Strength where it matters – at the compression point.
- Steel components are painted against corrosion.
- The Plugs are fitted with handle bars, to make it easier to locate the plug in the pipe.
- Can be supplied with twin outlets – lower outlet allows complete emptying of water from the drain before removal of the plug.
- Chemical resistant Seals can be supplied to order.
- "Double Seal" plugs supplied as standard.

Multi-lock Steel Test Plugs 450mm to 3000mm

- Multiple compression points around the perimeter of the plug enable the seal to expand in localised areas.
- Strength where it matters – at the compression point.
- Steel components are aluminium coated against corrosion.
- The Plugs are fitted with handle bars, to make it easier to locate the plug in the pipe.
- Can be supplied with twin outlets – lower outlet allows complete emptying of water from the drain before removal of the plug.
- Chemical resistant Seals can be supplied to order.
- “Double Seal” plugs can be supplied to order.
- “Instructions for use” label on each plug.
- Nominal pipe sizes, minimum and maximum pipe diameters each Plug will fit, maximum

- Ideal for use in all types of Plastic Pipe – the ridges around the circumference of the Bag prevent the Bag slipping down the pipe. Also designed for use in vertical Soil Stacks.
- Range available for pipe diameters from 25mm to 450mm.
- Easily inflated for trouble free pipe sealing and testing.
- Ideal for use in areas where access is smaller than the test diameter.
- Extension hose available to facilitate remote sealing and testing.
- Nominal pipe sizes, minimum and maximum pipe diameters each Bag will fit, maximum test pressure, and weight of Bag are available on our Web Site.

Canvas Inflatable Air Bags

- The answer to a variety of pipe sealing problems in all Industries from Sewerage, Petrochemicals, Food Processing, Mining etc.
- The Cover is available in Canvas, Heavy Duty Nylon, or Polyurethane coated to resist Petrol, Oil and Diesel.
- Range available for pipe diameters from 50mm to 4,000mm.
- Ideal for use in areas where access is smaller than the test diameter. Can also be supplied with the Inflation Tube in the centre to block off either side of a T.
- Easily inflated for trouble free pipe sealing.
- Fitted either with a Schrader Valve, or Brass Air Tap. Larger sizes fitted with Ball Valve for inflating using a compressor.
- Can be fitted with a Pressure Gauge to prevent over inflation.
- Extension hose available to facilitate remote sealing.
- Nominal pipe sizes, minimum and maximum pipe diameters each Bag will fit, maximum

A.T.O. Inflatable Pipe Stoppers for Air Testing of Sewers

All A.T.O. Inflatable Pipe Stoppers have test and blank ends.
 5mm thick closed-cell foam sealing surface.
 Car type valve for inflation.
 Pull tag for deflation.
 No removable parts.
 Hook and loop strap to attach U Gauge.

PATENT NO.GB2361283
TRADE MARK NO.2299965

Position/pull out handle on 600mm and above.
 Nominal bore + or – 6mm.
 Size range from 300mm/12" to 1800mm/70".
 Manufactured and tested to BSI standard.

High Pressure Inflatable Pipe Stoppers

- Maximum Allowable Back Pressure 3.0 bar (30m head water) **
- Maximum Inflation pressure 6.0 bar**
- Wide expansion range will work in all types of pipe – 100mm up to 2,000mm
- Lightweight, most sizes can be installed by one man
- Reinforced Synthetic Rubber for maximum durability
- Available in Nitrile for Hydrocarbon applications
- Compressor inflation controller
- Specials sizes on request

Socket Testing Devices for Pressure Testing Sockets in Concrete Pipes

- Enables each individual Socket to be precisely tested. Dramatically reduces the amount of water required.
- Can be supplied in up to 3 sections for Sewers with limited access.
- Suitable for pressure testing drains and sewers to BS.8005 and EN1610.
- Fitted with Wheels so the Device can be easily pushed up the Sewer.
- Superior design and quality ensures ease of use.
- Extension Hoses allow for remote testing.
- We can supply portable Compressors and associated equipment.
- Horobin guaranteed quality.

Drain Testing Kits for carrying out Air Pressure Test to BS.8005/EN1610

- The complete answer for pressure testing drains and sewers of any diameter.
- HOROBIN™ "Drain test Kit" is the only complete kit on the market for pressure testing 100mm drains.
- Suitable for pressure testing drains and sewers to BS.8005 and EN1610.
- Superior design and quality ensures ease of use.
- High visual impact for "Point of Sale" display.
- Horobin guaranteed quality.

Pipe and Drain Tracing Dye

- Tracing Dyes are supplied in 200gram Poly-jars in a range of 6 colours – GREEN, FLUORESCENCE, RED, BLUE, ORANGE, YELLOW & VIOLET.
- Tracing Dye is used for detecting the flow of water in drains or pipes, identifying individual drain runs into a common gully, and tracing leaks in pipes.
- Dyes are non-toxic and odourless. They are approved by the National rivers Authorities, Water Companies and Local Authorities.
- Green Dye contains 50% Fluorescence. The other colours are made from 100% food grade products.
- Use 5ml of Dye per 10 litres of cold water. The best method is to mix the Dye into a bucket of water, and then add to the flow of drain. A 200gram jar will trace up to 15,000 litres in chemical free water.

NEW ! We now have a Tracing Dye which is safe to use with Fish. This Dye can be used to trace leakages from Drains, Sewers, Ponds, Reservoirs etc. Sold in 5 kilo drums, which will trace up to 0.5 million litres of fresh water. Mix 500 grams with 10 litres of clean Water.

High Pressure Testing Plug – 6bar+

- For Pressure Testing and Temporary Sealing of Water, Gas, Oil and Sewerage Pipes of any material.
- Ideal for Pressure Testing Sewerage Pipes in accordance with the new European Standard EN1610.
- Pressure Plates are made of aluminium. Rubber Seals are commercial grade rubber mouldings. Thrustwashers are fitted as standard on all sizes.
- Pressure Gauge can be fitted as an option.
- Chemical resistant rubber seals can be supplied

High Pressure Testing Plug – 2

- For Pressure Testing and Temporary Sealing of Water, Gas, Oil and Sewerage Pipes of any material.
- Pressure Plates are made of steel. The Plugs are fitted with a Ball Bearing Race for ease of tightening. Rubber Seals are commercial grade rubber mouldings.
- Pressure Gauge can be fitted as an option.
- Chemical resistant rubber seals can be supplied

Warning - Appropriate bracing or support must be provided before applying any back pressure in order to prevent the risk of accident.

'Drain Clear' Set

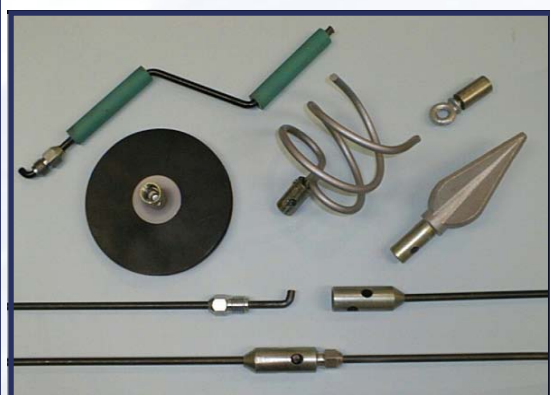

- Drain Clearance Set in a handy carrying case.
- Ideal for use with short drain runs up to 30m.
- Available with either Universal or Lockfast Fittings. The advantage of Lockfast Fittings is that they cannot come undone down the drain.
- Ready packed in a strong polypropylene carrying case.
- Set comprises of 30ft of rods, together with 100mm Plunger, Double Worm Screw and 100mm Drop Scraper.
- Horobin quality guaranteed.

- Ideal for use with short drain runs up to 30m.
- Available with either Universal or Lockfast Fittings. The advantage of Lockfast Fittings is that they cannot come undone down the drain.
- Compatible with most other makes of Polypropylene and Cane Rods.
- A wide range of Tools are available such as Rubber Plungers, Worm Screws, Drop Scrapers, Drain and Chimney Brushes.
- Rods available in 19mm, 21mm & 25mm diameter. Lengths are 3ft, 1.5m & 2m.
- Horobin quality guaranteed.

Polypropylene Drain Rods & Tools

Lockfast Steel Rods & Tools

- Ideal for use with long drain runs up to 1 km.
- Manufactured of high tensile steel, with a 2-way locking system which allows the Rods to be rotated both ways.
- Compatible with most other makes of Steel Rods.
- A wide range of Tools are available such as Rubber Plungers, Worm Screws, Drop Scrapers, Crown Root Cutters and Auger Root Cutters.
- Rods are available in 8mm and 10mm diameter. Lengths are 1m, 1.5m and 2m.
- Horobin quality guaranteed.

The use of pipe cutters rather than a hacksaw during installation of pipework avoids swarf entering systems which can cause problems on commissioning. High quality tools for use by professional and DIY plumbing installers, heating engineers and maintenance staff. Each tool assures a square, even cut.

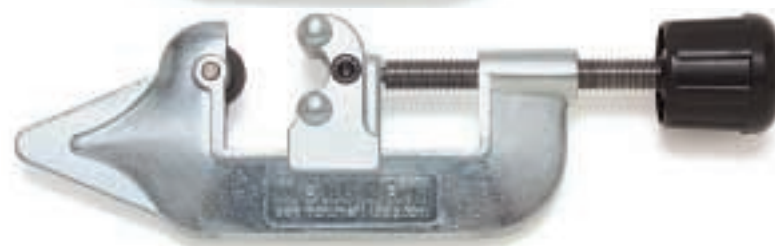

Cuts automatically once it has been sized and after tightening no further adjustment or feeding of the wheel into the pipe is required.

A strongly made outer ABS plastic casing houses the inside mechanism made from steel which takes the load of the cut.

Made from zinc pressure diecast bodies. All parts liable to wear are heat treated. The fluted handles of sizes 1 and 2A are fitted with a spare wheel.

Fitted with wheels for cutting stainless steel plumbing and other light gauge stainless pipes. Both fitted with spare wheel.

Fitted with wheels for cutting thicker walled plastic pipes such as those used in central heating. No spare wheel fitted inside handle.

For work in confined spaces. Strongly made outer ABS plastic casing houses the inside mechanism made from steel which takes the load of the cut. Cuts copper pipes once the gate of the tool is closed over the pipe. Tool can be rotated in either direction.

For work in confined spaces. Cuts in one direction. Only cut the exact sizes of copper pipe specified. Made from zinc pressure diecast bodies. Not for use on stainless steel.

Two separate handles. Fits where users' hands or pliers will not fit in confined spaces. Made from bright zinc plated steel and engage in the outer casing of the bodies. Can be neatly slipped on and off from either side of the pipe cutter.

Monument pipe cutter wheels are made from high quality, correctly heat treated steels.

COPPERKEY®

Order Code	Size mm	Display Pack	Use
2915Q	15	✓	15mm pipe & fittings
2922M	22	✓	22mm pipe & fittings

The very best and safest way to prepare copper pipe and copper fittings. Long lasting double stemmed brushes clean quickly. Quick thorough tubing prep with patented tungsten carbide abrasive technology. Works 3 times faster and lasts 4 times longer than conventional tools.

Patented ratchet handle makes jobs possible in all tight spaces. Eliminates the risk of scrapes or flux burns.

Pack of 3 brushes with loop handle and nylon bristle heads

180 grit silicone carbide strips of abrasive waterproof open mesh material for tough cleaning jobs. For roughing up plastic pipe, cleaning inside fittings (can be cut into small strips), deburring metal and wood surfaces.

Medium grade 50 mm x 250 mm pads for cleaning, polishing, rust removal, scrubbing and blending. Washable, will not rust and does not break up during use.

Designed to remove an olive from copper pipe without damage to the pipe and without producing swarf.

Carbo nitrided carbon steel cutting blades. Specifically designed to remove copper and brass olives. Do not attempt to remove stainless steel olives with this tool.

Patented tool for removing 15mm, 22mm and 3/4" olives. Engages with 14tpi thread of the compression fitting.

For joining two pieces of copper pipe of equal diameter together without using fittings. The resulting capillary joint can be soft or hard soldered. The loose socket former allows easier withdrawal of tool after use.

Soft bristles, varnished handle. Pack of 3

The H2&O Wet & Dry Test Kit has been designed to offer the professional plumber & installer the equipment to pressure test most common applications with its selection of connectors and gauges

Pressures of up to 25 bar can be read from the Gauges with an accuracy of +/- 2.5%. Each gauge is protected with a high shock absorbing rubber boot cover.

Additionally a peak reading needle allows for readings to be taken when the gauge is left unattended. Connections to copper or plastic tube (15mm & 22mm) or thread (1/2"bsp & 3/4"bsp) can be made with the selection of adaptors

A 10 bar flexible hose also allows for testing in confined or restricted areas

System filling can be achieved with the aid of the 3/4" tee piece

WET AND DRY TEST KIT

Order Code	
1514R	Kit Contains:
	1 x Plastic Carry Case
	1 x Dry Test Gauge 63mm diameter (0-4bar) x 15mm JG Speedfit™ c/w Schrader Valve test point fitted with Peak Reading Needle
	1 x 63mm diameter Pressure Gauge (0-11 bar) fitted with Peak Reading Needle
	1 x 63mm diameter Pressure Gauge (0-25 bar) fitted with Peak Reading Needle
	3 x Rubber Gauge Boots fitted to above
	1 x Rubber Tap Connector
	1 x 10 bar Flexible Hose
	1 x Gauge Adaptor
	1 x PVC covered chain c/w 2 screws & washers
	1 x CP Reducing Bush 3/4" x 1/2"
	1 x JG Speedfit™ 15mm x 1/2" stud
	1 x JG Speedfit™ 15mm x 1/2" stem
	1 x JG Speedfit™ 22mm x 3/4" stud
	1 x JG Speedfit™ 22mm x 3/4" stem
	6 x O rings
	1 x Filling Tee Adaptor 1/4"

MOPITUP®

Order
Code

2951Y

Pack of 3 sheets

The versatile super absorbent sheet. The quick, easy and effective way to clean up all water based spillages in the home or workplace. Each 370mm x 370mm sheet absorbs up to 2 litres of water

Mopitup® will ONLY absorb water based fluids.

Can be placed ONTO spilt water by turning it so the plastic side is upper most and the net is towards the water spill. Can be placed INTO water containers and will "suck" out the water i.e. draining cisterns, drains, holes. The 'gel' formed is non toxic and safe (but note that the contents are only safe NOT the additive contaminant).

Ideal for :

- plumbing emergencies and repairs
- dripping radiators
- radiator and pump removals
- leaking pipes, toilets and basins
- overflow leaks in roof tanks
- leaking hot water tanks
- fridge and freezer defrosting
- large floor spillage
- protection for carpets and floors
- draining header tanks
- no drips, no mess, no stains
- water is 'locked' in and cannot be squeezed out, unlike a sponge

Patented variable cut out mats for soldering pipes. Reduces the risk of fire. Protects walls, cables, carpets and other flammable materials. The unique shape with overlap gives a tight and secure fit.

For mounting screws at the rear of boilers

For fixing toilet pans to the floor

Used for opening up lead pipe prior to joint wiping. Made from polypropylene.

Used for wiping lead joints during soldering. Made from best quality moleskin cloth, 6 ply thick. Properly folded with oilboard layer and securely sewn.

Best quality white moleskin cloth, closely woven. Approx 36in. 91cm wide

Used as a lubricant for threading, pulling electric cables through conduit etc. Best quality hard white tallow.

Used for packing and insulation. Asbestos free. For operational temperatures up to 600 deg C. Resistant to oils, most chemicals and solvents and is unaffected by bacterial growth. Constructed from a thick glass yarn wall coupled with a stranded centre glass yarn core. Ideal for use in dry, static sealing applications involving hot air and combustion gases. Supplied on reels.

1899G Plumbers Holesaw Kit with 22mm 28mm 35mm 45mm 50mm 64mm holesaws with integral shanks. Includes 2 drills and screwdriver and display box.

Junior hacksaw with finger guard and 32tpi blade.

For drilling holes in timber joists etc.

Very thin 42tpi blade for accurately cutting all kinds of materials including ferrous materials. Wooden handle.

For use on stainless steel, cast iron, mild and galvanised steel, aluminium, copper, brass, plastics and wood. High quality tools with M42 Cobalt High Speed Steel Cutting blades with variable pitch teeth.

Holesaws with integral shank and pilot drill supplied with a split point HSS pilot drill which reduces skidding on convex surfaces, eliminating the need for pre-punch.

Depth of cut 32mm (double depth if the work is reversed). Do not exceed recommended working speeds, as shown in table opposite.

ESSENTIAL LUBRICANTS :

When cutting mild steel (incl. aluminium, copper, brass, zinc, plastics, wood) no lubricant is necessary.

When cutting cast iron use paraffin. When cutting stainless steel use Cutting Compound.

613M RAPID DOSE Tool kit

630N Central heating protector. Protects against scale, corrosion & bacterial growth. 200ml can treats 5 radiators.

632T Pre-commissioning cleaner. Removes flux residues, greases, oily contaminants, sludge and debris 400ml can treats 10 radiators.

633W Non Acid Sludge Dissolver. Dissolves sludge and restores heat and flow. 400ml can treats 10 radiators..

634Z 400ml Central Heating Protector

635C Inhibitor Test Kit. Tests the concentration level of inhibitor. 40 tests per kit.

Dose a sealed system within a matter of minutes with RAPID-DOSE

- No need to draw off water, release system pressure or wait for system to cool
- Specifically designed to meet the requirements of modern condensing boilers
- Discharges in under a minute
- Suitable for all metals including aluminium
- No mess.

How does RAPID-DOSE work?

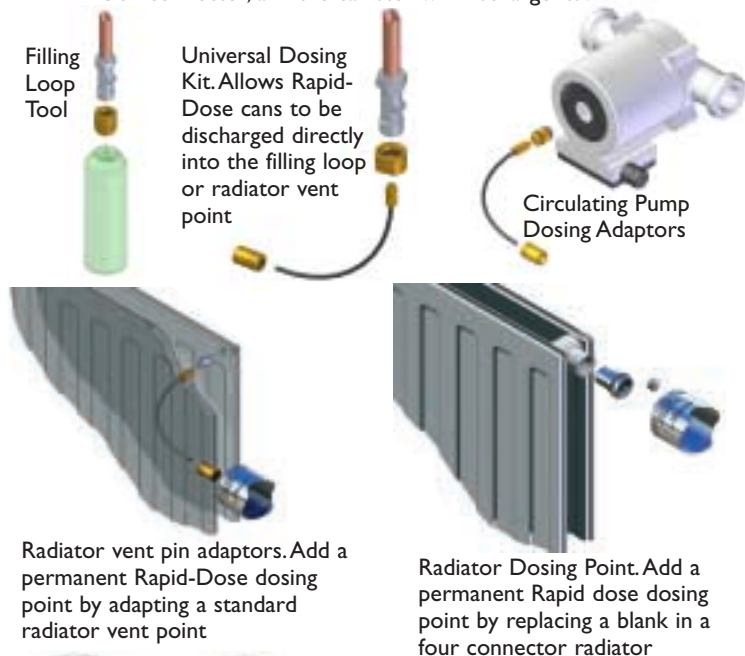

RAPID-DOSE works by holding the product (inhibitor or cleaner) in a bag inside the canister. This separates the product from the propellant and means that although the product is squeezed out of the bag by the pressure, the propellant never leaves the canister. As the pressure in the canister is greater than system pressure, the canister rapidly discharges into the heating system.

THE EASY WAY TO DOSE SEALED HEATING SYSTEMS

Aqueous Logic is revolutionising water treatment with a new dosing system designed to make water treatment easier and less expensive. RAPID-DOSE is a disposable pressurised canister, pre-filled with inhibitor (or cleaner), that can be used to dose a sealed system within a matter of minutes. There's no need to release system pressure or draw off water. Simply connect the canister to the filling loop isolation valve, radiator dosing point or circulating pump dosing point using the purpose designed RAPID-DOSE connector, and the canister will discharge itself.

Radiator vent pin adaptors. Add a permanent Rapid-Dose dosing point by adapting a standard radiator vent point

Radiator Dosing Point. Add a permanent Rapid dose dosing point by replacing a blank in a four connector radiator

Boxed kit contains:

- 1x 621L Universal Dosing Kit
- 1x 612J Radiator Dosing Point
- 3x Radiator Vent Pin Adaptors (M4 M5 M6)
- 1x 626A Pump Dosing Point
- 1x 3mm Allen Key

Flitz Paste Metal Polish is a concentrated cream which cleans, polishes, de-oxidises and protects brass, copper, silver plate, chrome, stainless, nickel, bronze, gold, aluminium, painted surfaces, glass. Removes tarnish, water stains, chalking, lime deposits, heat discolouration, oxidation, tar, oil, tree sap. Non-abrasive, non-toxic, non flammable.

Accessories

1040A	E1001	Extension handle
1042G	B1001	Bottle jack

Monument 'Safe Lift' manhole cover lifting set, with heavy duty quick release tip system, interchangeable tips, 3 lifting positions and a unique 1 tonne popping facility. Additionally, the 'Safe Lift' features include one piece stainless steel tips ergonomically designed comfortable lifting handles and an optional extension handle.

The optional extension handle incorporates a crow bar style tip to facilitate lifting of covers, can be used to extend the standard heavy duty quick release handle and also, when used in conjunction with a bottle jack, to 'pop' stubborn covers.

HYDRAULIC MANHOLE COVER LIFTER

Order Code	
1043J	Hydraulic manhole cover lifter
1044M	Spreader Bars

Hydraulic manhole cover lifter is quick to assemble and simple to use. The lifter can give up to 1.5 tons of lift, making easy work of the heaviest manhole cover. The lifter is supplied with 4 sets of keys which will enable most types of cover to be lifted. Weight 25kg.

Also available are spreader bars which enable 4 keyhole covers to be lifted. These bars also have a seal breaker which help ease covers which have not been lifted in a long time.

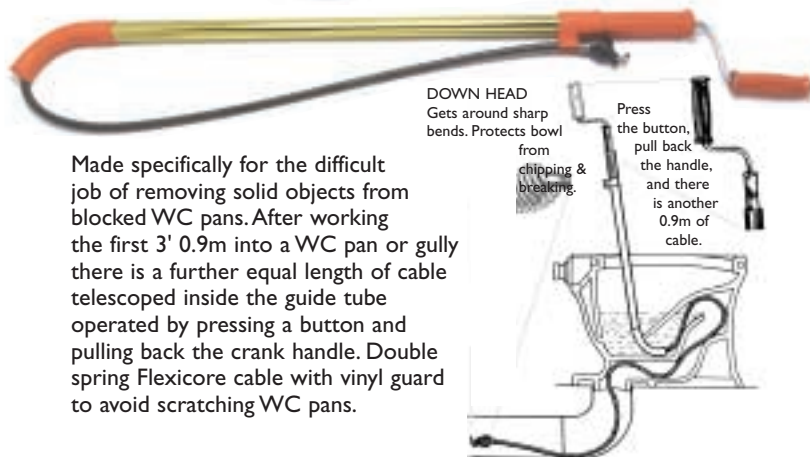

Handy Snakentainer helps eliminate messy floors when cleaning out blocked small pipes. Collet chuck tightens firmly on cable with a quarter turn. Rotation by electric drill or crank handle whilst holding rotating hand grip. Durable steel container can hold up to 25' x 3/8" or 50' x 1/4" cable.

Rotary Handle – Instead of using the Snakentainer above, the handle with two smoothly operating hand grips will fit all the cables shown on the left. The locking screw of the handle fixes the cable in position whilst rotating.

All GENERAL professional quality hand tool cables have a 42 strand wire rope centre. Coiled right handed to make manual operation easier through greater flexibility.

A large crank handle at the back of the drum gives powerful leverage. After a few turns the speed and momentum breaks through the most obstinate blockages. Rust resistant treated steel drum with carrying handle fitted.

Made specifically for the difficult job of removing solid objects from blocked WC pans. After working the first 3' 0.9m into a WC pan or gully there is a further equal length of cable telescoped inside the guide tube operated by pressing a button and pulling back the crank handle. Double spring Flexicore cable with vinyl guard to avoid scratching WC pans.

DOWN HEAD
Gets around sharp bends. Protects bowl from chipping & breaking.

Press the button, pull back the handle, and there is another 0.9m of cable.

Compact, lightweight water ram uses a burst of compressed air from a carbon dioxide bulb to produce kinetic transfer of energy through water to remove blockages in pipelines. Ideal for "soft" blockages such as those normally encountered domestically caused by organic matter e.g. paper, hair, fat, grease, general kitchen waste, plastic cups, towels, uric acid and soft lime scale etc.

PROFESSIONAL DRAIN UNBLOCKERS

3311M D-25-0 Empty Container with Electric Drill attachment.

POWER DRAIN CLEANER COMPARISON CHART

	Typical Applications	For use in following Pipe Sizes	Maximum Capacity	Operating Weight	Maximum Recommended Distance	Motor Horsepower
• SUPER-VEE	Sinks	1 1/4" - 3"	35' x 3/8" or	7kg	50'	2.7 A
• POWER-VEE	Bath Wastes	(35 - 75mm)	50' x 5/16"	with 25' x 3/8"	(15m)	
• HANDYLECTRIC	Roof Stacks		(10.5m x 10mm or 15m x 8mm)	(7.5m x 10mm)		
• PH DRAIN ROOTER						
• MINI-ROOTER	Small drains,	1 1/4" - 3"	75' x 1/2"	23kg	75'	1/3HP
• MINI-ROOTER XP	Inside work, On roofs (Not for roots)	and most 4" (35 - 75mm and most 100mm)	(23m x 12mm)	with 75' x 3/8" (23m x 10mm)	(23m)	
• SEWEROOTER T-3	Small drains, Inside work, On roofs (Not for roots)	1 1/4" - 3" and most 4" (35 - 75mm and most 100mm)	100' x 1/2" (30m x 12mm)	52kg	100' (30m)	1/3HP
• METROROOTER	Roots and scale	3"-6"	75' x 5/8" (23m x 16mm)	76kg	75' (23m)	1/3HP
• SPEEDROOTER 91	Combination Sewerooter T-3 and Maxi-Rooter	2" - 10" (50 - 250mm)	100' x 3/4" or 100' x 1/2" (30m x 19mm or 30m x 12mm)	108kg	200' (60m)	1/2HP (Optional 3/4HP)
• MAXI-ROOTER	Heavy Duty Roots, Sand, Rags Grease, Lime Deposits, Industrial Plants	3" - 10" (75 - 250mm)	125' x 3/4" or 150' x 5/8" (38m x 19mm or 45m x 16mm)	114kg	200' (60m)	3/4HP

GENERAL ELECTROMECHANICAL DRAIN CLEANERS

All the GENERAL Electromechanical Drain Cleaners use FLEXICORE WIRE ROPE CENTRE CABLES. Heavy gauge wire is coiled around 42-strand wire rope and heat treated. Cables are of high strength and correct flexibility. Electric machine cables are wound left hand.

Heavy gauge wire coiled tightly around a 42 strand aircraft type wire rope and heat treated. Has the correct strength and flexibility. 1/4" and 5/16" cables have basin plug ends and cables of 3/8" 10mm and larger can be fitted with cutters to their female connectors.

FLEXICORE CABLE

Replacement Cables / Cables for Super-Vee, Power-Vee, Collet Chuck Handylectric and PH Drain Rooter:

Order Code	Cable No	Dia. & Length m x mm	ft x in	Wt. kg

Order Code	Part No.	
3035W-PV		Plastic Carrying Case
3012D	PC	Plastic Cartridge
SV-25	SV-25	Cable Grippers

Similar in specification to the Super-Vee with added features: Feeds cables forwards or back, by means of a feed lever. Drives 10mm 3/8" cables at 16' 4.8m per minute. Adjusts for different sized cables by adjustment of the cable knob until it touches the cable and backing off half a turn. Particularly useful in awkward places when the cable is difficult to feed.

Backer

Backer Electric Company Limited, founded in 1938, is the market leader in the design and manufacture of heating elements, supplying products in high volume to the majority of household brandnames, producing domestic electrical appliances, spares to parts distributors and specialist elements for use in Industrial, Catering and Commercial applications.

Backer manufactures all products to the most stringent quality control procedures, meeting all of the relevant British and European standards.

09192L
ELEMENT FOR WATER HEATERS, 3 KW

The BMST Thermostat is an ideal solution for retrofit to existing installations, thus bringing your old system up to the new standard by simply changing the thermostat.

Tubular Traps with 75mm Water Seal

Domestic Appliance Traps 1 1/2" x 75mm Water Seal

General

- Domestic Appliance Traps provide the facility to accept the discharge from a washing and/or dishwashing machine(s) and are suitable for new and existing installations
- In all cases a blank cap, plug or blank nozzle is provided with the trap. Should the domestic appliance not be connected at the time of installation, the trap will function as a normal sink trap whilst providing an easily accessible point for the future installation of any appliance(s)

Standpipe Trap and Fittings

Standpipe Cap with retaining clip

Code WM3-CAP

Twin Connector for plumbing two domestic appliance discharge hoses into standpipe trap

- Multifit outlet to suit either 1 1/2" or 40mm diameter standpipe
- 135° swivel nozzles for washing and/or dishwashing machine discharge hoses - supplied with blanking plugs
- Discharge hose(s) to be taken to the height stated by the appliance manufacturer(s)
- An air break, as specified by appliance manufacturers is incorporated within the connector

Code V33WM

Standpipe Trap

Code WM3*

All traps marked* available as anti-siphon (Silentrap). Add suffix 'V' to code. See page 4 for technical details

Sink Trap with TeeVent

- The TeeVent system, which incorporates a non-return valve, provides an air break and enables the waste system to be sealed. This system has the advantage over a standpipe arrangement in that should a blockage occur, the non-return valve prevents flooding
- TeeVent fittings may be used with domestic appliance trap WM4
- All domestic appliance traps must be fitted in accordance with the fixing instruction leaflet included with each trap

Code TV1

Code TV2

- TV1 can be connected direct to the trap
- TV2 can be extended away from the trap by inserting a length of 1 1/2" waste pipe between Multifit connections of the TeeVent and the trap

Condensate Products for Connecting Condensate Discharge

Basin and Sink Traps

1 1/4" x 75mm Water Seal Tubular Swivel Basin Trap with adjustable inlet and connection for 19/23mm pipe. Supplied with blanking cap

Code ASA10-SP*

1 1/2" x 75mm Water Seal Tubular Swivel Sink Trap with adjustable inlet and connection for 19/23mm pipe. Supplied with blanking cap

Code ASC10-SP*

1 1/2" x 75mm Water Seal Tubular Swivel Sink Trap with adjustable inlet, nozzle for discharge hose of domestic appliance and connection for 19/23mm pipe. Supplied with blanking cap

Code ASC10-CO*

19/23mm Inlet and Outlet x 75mm Water Seal Offset Trap to receive discharge from condensing boiler. Supplied with support clip

Code OBT1-CO

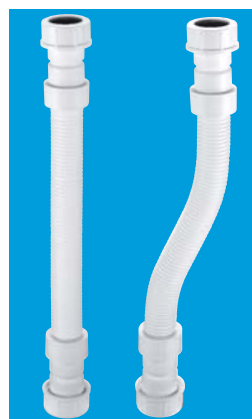

34mm Open Inlet x 75mm Water Seal Offset Trap to accept flexible pipe from condensing boiler. Supplied with support clip

Code OBT2-CO

Flexible Connector from Condensing Boiler to Rigid or Flexible Condensate Discharge Pipe

- Easy connection to boiler condensate discharge pipe
- Allows for disconnection in freezing conditions for discharge to be redirected into a receptacle
- Universal connections suitable for 19/23mm rigid pipe and 25mm flexible pipe

200mm Flexible Connector

Code CONFLEX-200

300mm Flexible Connector

Code CONFLEX-300

Flexible Condensate Pipe Kit

- For use in installation of condensing boilers
- Eliminates use of traditional rigid discharge pipe and fittings thereby allowing complete flexibility to discharge point
- Includes fittings to allow for easy connection to sanitary pipework
- Allows for disconnection in freezing conditions for discharge to be redirected into a receptacle
- Particularly useful where installation space is restricted

Flexible Condensate Pipe Kit - contents

- 1 x 3m length of 25mm flexible pipe
- 6 x 25mm pipe clips
- 2 x Straight connectors with universal connections suitable for 19/23mm rigid pipe and 25mm flexible pipe
- 1 x 1 1/2" plain tail ABS solvent weld reducer to 19/23mm rigid pipe and 25mm flexible pipe

Code

CONFLEX-KIT1

Bath Fillers with Trap and Overflow

General

- Filler manufactured in cast brass
- Compact filler design 70mm diameter x 25mm deep suitable for curved baths
- Will fit overflow hole size 46mm to 65mm
- 0.5 bar pressure produces 33 litres per minute
1.0 bar pressure produces 44 litres per minute
2.0 bar pressure produces 57 litres per minute
- 650mm WRAS approved braided hose with 90° bend
- All traps 1 1/2" x 50mm water seal with Multifit outlet
- Compression overflow connection to trap

- **HC2650UK-FIL** has a standard overflow length of 575mm but is available with a 1m length. Incorporates a swivel bath trap and CP brass waste with top access spring-loaded mushroom plug. Overall height 109mm
- **HCN3365UK** has a standard overflow length of 575mm but is available with a 1m length. Incorporates a CP brass waste and spring-loaded mushroom plug
- **HCN3165UK** has a standard cable and overflow length of 575mm but is available with a 1m cable and overflow. Incorporates CP brass waste and mushroom pop-up plug

Overflow Manifold (Wasteflow)

General

- Bath Wasteflow units enable the overflow and/or warning pipe from a cold water storage cistern and a WC flushing cistern (not fitted with an integral overflow) to be installed so that the discharge is directed into the bath via the bath overflow grating
- The construction of the Wasteflow is such that whilst acting as a conventional overflow for the bath, any overflow from a connected cistern is discharged through the overflow grating into the bath thereby providing a visible warning
- A feature of the Wasteflow design ensures that should the overflow grating be blocked, the overflow from the cistern is diverted to discharge directly into the bath trap and not

back along the overflow pipe thereby reducing the risk of flooding

- Wasteflow is also available with connection for condensate or condense drain

Advantages

- Wasteflow is available in various forms that allow greater flexibility for the discharge of cistern overflows, condensate and condense
- No unsightly external overflow pipes
- No damage to outside walls
- No risk of freezing
- No risk to other tenants or public

Installation

- Wasteflow is supplied with a choice of 50mm, 60mm or 75mm water seal trap
- Wasteflow is installed under the roll of the bath
- Wasteflow fittings shown on page 20 enable a range of connections that may be housed within the roll of the bath or if necessary extended into a duct space
- Overflow pipes connected to Wasteflow should have an adequate and continuous fall to ensure a natural gravity discharge

The Plumbers' First Choice

Condensation Trap

Condensation Trap has been designed as a straight socket connector for 110mm and 125mm pipe (commonly used as ducting for basic air extraction systems) and provides an internal trap/diverter which will collect condensation forming on the internal surface of the extract pipework. It allows for the connection of a 19/23mm pipe, which can be installed to drain off the condensation to a convenient position

Aluminium R oof Flashing (MacFlash)

General

- MacFlash Aluminium Roof Flashing offers an alternative to traditional lead roof slates
- The aluminium flashing is manufactured from high grade aluminium and the collar from synthetic rubber, both to British Standards. The collar is die-formed to the aluminium flashing

Advantages

- MacFlash is quickly and easily installed and offers cost savings in material and labour
- MacFlash is suitable for flat roofs and for roof pitches up to 45°
- MacFlash has special corrugations that can be easily dressed to form a seal
- MacFlash can be used with flue pipes from condensing boilers

Nominal Pipe Size 4"/110mm pipe

Flexible WC Connectors for Back to Wall WC Pans

- Tested to BS 5627:1984
- Flexible Connectors provide a secure and reliable connection to the WC pan spigot prior to the final placement against wall or furniture
- Inlet connections are manufactured in soft synthetic rubber and are secured to the WC pan by a worm drive hose clip
- Flexible Connectors are suitable for use with all WC Pans with a short or misshaped outlet spigot
- Flexible Connectors allow for misalignment of pan outlet and soil pipe
- Flexible Connectors allow for easy positioning and removal of WC Pan

Closed Position

Fully Extended Position

Flexible WC Connectors for Back to Wall WC Pans

Celmac is a leading brand of CME Sanitary Systems Limited, recognised throughout the world. The unique range of products within the Celmac Toilet Seat Collection is made possible by the combined manufacturing capabilities of specialist sites in England and abroad.

The Celmac toilet seats and covers shown below have been fully impregnated with Polygiene™. This is particularly important for use in hospitals, care homes, public buildings, fast food restaurants, hotel chains, airports, mass-transit facilities and other public areas as well as in domestic homes. Polygiene™ contains pathogen killing properties which are proven to be effective in the control of SARS-coronavirus (SARS-CoV). Why take the risk - use Polygiene™.

Concerto seat and cover, including smooth close hinge

Concerto chrome plated smooth close hinge

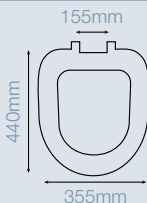

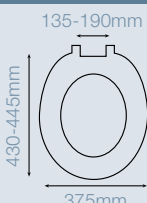

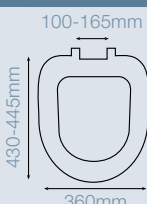

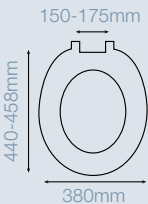

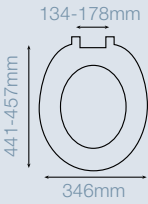

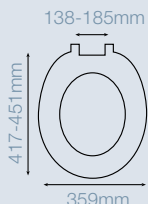

Tango plastic colour matched smooth close hinge

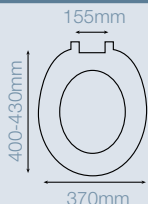

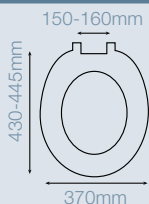

Monarch chrome plated smooth close hinge

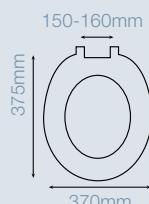

Manufactured using gel filled dampers, which allows the seat and cover to close slowly and silently without slamming. All the systems are equipped with a bypass system, which will stop any damage or breakage occurring should the seat or cover be forced shut against the smooth closing action, helps prevent children's fingers being caught.

REMEX FLOAT SWITCHES are specifically designed for the automatic control of all types of electrically driven pumps, alarm systems and indicators where a rise or fall of any form of liquid is required, or where tanks require automatic emptying or filling.

Remex Type "B01"

Technical Data

Specifications	Liquid Temperature:	0 to 60 degrees C
	Contact Rating:	AC, 10 AMP, 250V
	Switching Differential:	200

Weight	<i>Cable Length</i>	<i>Weight of B-01 Float Switch</i>
	3 m.	0.7 kg
	5 m.	1.0 kg
	10 m.	1.5 kg
	20 m.	2.0 kg

GREER

Chemical Resistance

Acids	Acetic Acid 50% & 70%	Boric Acid	Acid Solution (5%)
	Benzoic Acid	Citric Acid	Tannic Acid
Bases	Ammonium Hydroxide	Potassium Hydroxide	
	Sodium Hydroxide	Calcium Hydroxide	
Salts	Aluminium Chloride	Ferrous Sulphate	Sodium Nitrate
	Calcium Sulphate	Magnesium Chloride	Sodium Bicarbonate
	Calcium Chloride	Potassium Sulphate	Sodium Carbonate
	Calcium Nitrate	Potassium Nitrate	Zinc Sulphate
	Copper Chloride	Potassium Bicarbonate	Zinc Chloride
	Copper Sulphate	Sodium Sulphate	
	Ferric Chloride	Sodium Chloride	
Solvents	Formaldehyde 37%	Methyl Alcohol	
Gases	Carbon Dioxide	Carbon Monoxide	

Remex Type "P"

Technical Data

5 or 10 amp - 220V - 440V - Single Pole

Special consideration has been given to the spring movement resulting in exceptional equal balance, the special choice of material for the spindle results in the prevention of any seizing.

Minimum liquid variation 1.25" (32mm)

Float

A weight balanced float that can be used in temperatures up to 80 degrees C (158F).

Nylon Plated Cord

A 3 feet (0.9m) is available as standard but longer lengths are available. This is impervious to most liquids and is fixed with a stainless steel spring hook.

Stops

These are adjustable non slip stainless steel spring stops specially designed for the Remex Type "P".

Weights

A.B.S. thermoplastic encases the weight and counterweight. This is ideally suited for installation where hygiene is a prime requirement.

Remex Type "C"

Float Equipment

Polythene Float (standard): 5" in diameter, these are injection moulded for liquid temperatures up to 55-60 C. They can be used for weak acids and oils but not suitable for hot detergents.

Copper Float: 5" in diameter, brazed or soldered at the seams. For continuous immersion in boiling water. They are also suitable for certain liquids such as oils or solvents up to 100 degrees C.

Stainless Steel: 5" in diameter also suitable for oils and solvents and hot water and return condensates. The added advantage of such a float is if hygiene is required.

Chain Equipment

A 3 feet (0.9m) length of brass chain is available as standard on all die-cast Remex switches. However longer lengths are available to customers' requirements.

Weight Equipment

Enamelled cast iron weights and counterweights are provided as standard and further weights can be added if required.

Stop Equipment

Adjustable stainless steel float stops are provided as standard to suit all operations.

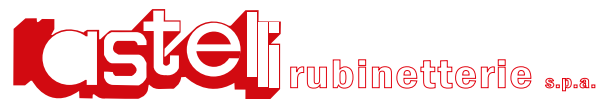

Rod Equipment

Copper Rods: 6.3mm in diameter rods are available in lengths 3 - 10 feet (0.9 - 3m) with properly balanced weight to match the counterweight. A rod operation is recommended for use where there is a turbulence or sludge, e.g. septic tanks.

Stainless steel rods: the added security of stainless steel would be suitable for hygiene purposes. Lengths range from 3 - 10 feet (0.9 - 3m).
